When we approach the police officer ref the consult, we will make that inquiry. This video may also potentially assist the medical professionals with diagnosis/treatment.

Will also attempt to confirm exact application times on Wednesday from other sources, i.e., CID, DPNR, Terminex. The complex management company believes it was between 10-12 AM.

If we can correlate that to family movements on Wednesday and Thursday, that may assist the doctors. And as the family health improves, obtain information (perhaps through Mr. Moran) as to any visitors they entertained on those two days for follow-up to potential exposure.

>>> Good evening. I am one of the police officers in Virgin Islands who located Mr Esmond Stevens in his villa after he was able to walk out of the hospital without being discharged. I remained in the villa for at least one half hour and was able to capture a few seconds of video footage with Mr. Stevens experiencing convulsions. I will be visiting a doctor for a thorough examination since we (officers) were sent into an unknown environment without protective gear and could be at risk with what was alleged to have affected Mr. Esmond and his family. Send the family my regards and let them know that I am praying for their speedy recovery. Should you need any further information you can contact me at this email. Thank you
